

Amirreza Bagheridelouee

+1 (650) 444-4155 | amirbd@wharton.upenn.edu | [Website](#) | [LinkedIn](#) | [GitHub](#) | Philadelphia, PA

EDUCATION

- Stanford Graduate School of Business** Sep 2024 – Jun 30, 2026
Predoctoral Research Fellow (Non-matriculated Student); [Transcript](#) *Stanford, CA*
- **Graduate coursework:** Microeconomic Analysis I; Econometrics I–III; Game Theory, Data Science & AI; Reinforcement Learning; Convex Optimization I.
- Sharif University of Technology** Sep 2019 – Jul 2024
B.Sc. in Computer Engineering, Minor in Economics; GPA: 3.90/4.00 *Tehran, Iran*
- **Thesis:** [Metric Distortion Under Public-Spirited Voting](#).
 - **Selected coursework:** Machine Learning; Social and Economic Networks; Econometrics; Industrial Organization; Financial Machine Learning; Financial Engineering.
- London School of Economics and Political Science** Jul 2023 – Aug 2023
Summer School; Financial Risk Analysis and Advanced Corporate Finance; [Transcript](#) *London, UK*

PUBLICATIONS

Amirreza Bagheridelouee, Marzieh Nilipour, Masoud Seddighin, and Maziar Shamsipour. “Metric Distortion Under Public-Spirited Voting.” *Proceedings of the 23rd International Conference on Autonomous Agents and Multiagent Systems (AAMAS 2024)*, pp. 2144–2146.

RESEARCH EXPERIENCE

- Researcher, The Wharton School** Jul 1, 2026 – Present
University of Pennsylvania *Philadelphia, PA*
- Predoctoral Research Fellow, Stanford Graduate School of Business** Sep 2024 – Jun 30, 2026
Selected research projects *Stanford, CA*
- FIFA Ticketing** Sep 2025 – Jun 30, 2026
- Collected and analyzed marketplace and Fifachain transaction data for FIFA Collect, including 2026 World Cup ticket-related digital assets.
- Supervisor: [Prof. Paulo Somaini](#).*
- Congestion Pricing and Carpooling** Jul 2025 – Jun 30, 2026
- Built trip-level datasets for Manhattan’s central business district using Replica and Google Maps APIs to study carpooling responses to congestion pricing.
 - Synthesized evidence on how parking fees and congestion charges affect carpooling ([paper](#)).
- Supervisor: [Prof. Michael Ostrovsky](#).*
- Power Plants, Transmission Lines, and Data Centers** Jul 2025 – Sep 2025
- Developed a PowerModels.jl model to predict electricity generation from bid data and network constraints.
 - Diagnosed inconsistencies between ERCOT SCED bid data and realized generation.
- Supervisors: [Prof. Ali Yurukoglu](#) and [Prof. Omer Karaduman](#).*
- Port Substitution and Congestion in the Container Shipping Industry** Sep 2024 – Jun 2025
- Built a ship-identity resolution algorithm to correct missing and inconsistent vessel identifiers.
 - Developed reproducible pipelines to clean, merge, and benchmark customs-import and product datasets.
 - Estimated trucking costs from fuel-price and wage variation.
- Supervisors: [Prof. Shoshana Vasserman](#) and [Prof. Stephen Redding](#).*

Generative AI and Creative Goods — Paper

Sep 2024 – Jun 2025

- Generated text embeddings from image titles and tags and estimated the effects of generative AI using difference-in-differences with propensity-score matching.
- Trained and tuned a random forest model to predict image sales from embeddings and keywords.

Supervisor: Prof. Samuel Goldberg.

ADDITIONAL EXPERIENCE

Research Assistant, Tehran Institute for Advanced Studies

Aug 2023 – Aug 2024

Prof. Masoud Seddighin

Tehran, Iran

- Established upper and lower distortion bounds for voting rules under public-spirited preferences.

Research Assistant, National University of Singapore

Feb 2023 – May 2023

Prof. Poorya Kabir

Remote

- Analyzed household survey data to study how Medicaid expansion affected stock-market participation and risky-asset holdings.

Algorithmic Trading Intern, Danesh Co.

Jun 2022 – Sep 2022

Quantitative research internship

Tehran, Iran

- Developed sentiment-based trading signals from social-media discussions of the stock market.

AWARDS

- Silver Medal**, 51st International Chemistry Olympiad, Paris, France, 2019 (certificate).
- Gold Medal**, 28th Iran National Chemistry Olympiad, Tehran, Iran, 2018.

SELECTED PROJECTS

Financial Text Modeling in Julia

- Built a dependency-light Julia suite for sentiment analysis, classification, topic modeling, word embeddings, and SEC-document preprocessing, with automated tests and synthetic examples.

Crash Course Content Analysis

- Developed a reproducible NLP pipeline for corpus statistics, part-of-speech analysis, and YAKE keyphrase extraction across educational-video transcripts.

Online Food Delivery Simulation

- Reimplemented a discrete-event simulation of priority queues, service capacity, timeouts, and utilization with reproducible scenarios and automated tests.

Narratives and Herding: A Neuroeconomics Essay

- Proposed a testable hypothesis linking narrative processing and herding behavior through shared neural mechanisms.

TEACHING EXPERIENCE

Teaching Assistant, Sharif University of Technology

2021 – 2024

Game Theory; Financial Economics; Econometrics; Principles of Economics; Microeconomics; Data Structures and Algorithms

Chemistry Olympiad Teacher, Sampad High Schools

2018 – 2022

Part-time instructor

TECHNICAL SKILLS

Programming: Python, Julia, R, C/C++, Java, Stata

Data and ML: pandas, NumPy, scikit-learn, statsmodels, TensorFlow, PyTorch, GeoPandas

Tools: Git, L^AT_EX, Slurm, SQL, Redivis, Google Cloud APIs

Languages: Persian (native), English (fluent)
