

Amirreza Bagheridelouee

☎ +1 (650) 444-4155 | @ amirbd@wharton.upenn.edu | 🌐 Website | 🔗 LinkedIn | 🐙 GitHub | 📍 Philadelphia, PA

EDUCATION

Stanford Graduate School of Business

Sep 2024 – Jun 30, 2026

Predoctoral Research Fellow (Non-matriculated Student); [Transcript](#)

Stanford, CA

- **Coursework:** Microeconomic Analysis I (MGTECON 600); Intermediate Econometrics I–III (ECON 270–272); Game Theory; Data Science & AI (MS&E 233); Reinforcement Learning (CS 234); Convex Optimization I (EE 364A).

Sharif University of Technology

Sep 2019 – Jul 2024

B.Sc. in Computer Engineering, Minor in Economics; GPA: 3.90/4.00; [Transcript](#)

Tehran, Iran

- **Thesis:** [Metric Distortion Under Public-Spirited Voting](#).
- **Selected coursework:** Differential Equations; Linear Algebra; Numerical Computation; Artificial Intelligence; Game Theory; Machine Learning; Social and Economic Networks; Advanced Information Retrieval; Design of Algorithms; Financial Machine Learning; Financial Engineering; Theory of Languages and Automata; Computer Simulation.

London School of Economics and Political Science

Jul 2023 – Aug 2023

Summer School; Analysis and Management of Financial Risk; Advanced Corporate Finance; [Transcript](#)

London, UK

PUBLICATIONS

Amirreza Bagheridelouee, Marzie Nilipour, Masoud Seddighin, and Maziar Shamsipour. “Metric Distortion Under Public-Spirited Voting.” *Proceedings of the 23rd International Conference on Autonomous Agents and Multiagent Systems (AAMAS 2024)*, pp. 2144–2146.

RESEARCH EXPERIENCE

Researcher, The Wharton School

Jul 1, 2026 – Present

University of Pennsylvania

Philadelphia, PA

Predoctoral Research Fellow, Stanford Graduate School of Business

Sep 2024 – Jun 30, 2026

Selected research projects

Stanford, CA

FIFA Ticketing

Sep 2025 – Jun 30, 2026

- Scraped and analyzed 1M+ observations from FIFA Collectibles, World Cup 2026 tickets, and Fifachain transactions.
- Combined marketplace and blockchain data to study demand and trading in FIFA NFT and ticketing markets.

Supervisor: [Prof. Paulo Somaini](#).

Congestion Pricing and Carpooling — [Paper](#)

Jul 2025 – Jun 30, 2026

- Built 1M+ Manhattan trip observations from Replica and Google Maps API to study congestion-pricing responses.
- Built a Manhattan car-count dataset from 25,000+ hours of unstructured video footage.
- Reviewed research on how congestion pricing and parking fees affect carpooling.

Supervisor: [Prof. Michael Ostrovsky](#).

Power Plants, Transmission Lines, and Data Centers

Jul 2025 – Sep 2025

- Developed a PowerModels.jl model to predict electricity generation from bid data and transmission-network constraints.
- Compared ERCOT-SCED bids with realized generation and diagnosed inconsistencies in the energy-market data.

Supervisors: [Prof. Ali Yurukoglu](#) and [Prof. Omer Karaduman](#).

Port Substitution and Congestion in the Container Shipping Industry

Sep 2024 – Jun 2025

- Resolved vessel identities across 150M+ maritime AIS and Panjiva observations using a ship-matching algorithm.
- Built reproducible customs and product-data pipelines and estimated trucking costs from fuel prices and wages.

Supervisors: [Prof. Shoshana Vasserman](#) and [Prof. Stephen Redding](#).

Generative AI and Creative Goods — [Paper](#)

Sep 2024 – Jun 2025

- Created image-title and tag embeddings and used them to predict image sales with a tuned random-forest model.
- Estimated generative-AI treatment effects using propensity-score matching and difference-in-differences.

Supervisor: [Prof. Samuel Goldberg](#).

ADDITIONAL EXPERIENCE

Research Assistant, Tehran Institute for Advanced Studies

Aug 2023 – Aug 2024

Prof. Masoud Seddighin

Tehran, Iran

- Established upper and lower distortion bounds for voting rules under public-spirited preferences.

Research Assistant, National University of Singapore

Feb 2023 – May 2023

Prof. Poorya Kabir

Remote

- Studied Medicaid expansion and household stock-market participation and risky-asset holdings using survey data.

Algorithmic Trading Intern, Danesh Co.

Jun 2022 – Sep 2022

Quantitative research internship

Tehran, Iran

- Developed sentiment-based trading signals from social-media discussions of the stock market.

AWARDS

- **Silver Medal**, 51st International Chemistry Olympiad, Paris, France, 2019 ([certificate](#)).
- **Gold Medal**, 28th Iran National Chemistry Olympiad, Tehran, Iran, 2018.

SELECTED PROJECTS

Financial Text Modeling in Julia

- Built a Julia toolkit for financial-text classification, sentiment analysis, topic modeling, and embeddings.

Crash Course Content Analysis

- Built an NLP pipeline to analyze vocabulary, parts of speech, and keyphrases in educational-video transcripts.

Online Food Delivery Simulation

- Simulated food-delivery queues to study service capacity, customer timeouts, and utilization.

Narratives and Herding: A Neuroeconomics Essay

- Proposed a neuroeconomic hypothesis linking narrative processing and herding behavior.

TEACHING EXPERIENCE

Teaching Assistant, Sharif University of Technology

2021 – 2024

- Led TA problem-solving sessions, designed assignments and lectures, and graded homework.
- **Courses:** Game Theory; Financial Economics; Econometrics; Principles of Economics; Microeconomics; Data Structures and Algorithms.

Chemistry Olympiad Teacher, Sampad High Schools

2018 – 2022

Part-time instructor

TECHNICAL SKILLS

Programming: Python, Julia, R, C/C++, Java, Stata

Data and ML: pandas, NumPy, scikit-learn, statsmodels, TensorFlow, PyTorch, GeoPandas

Tools: Git, L^AT_EX, Slurm, SQL, Redvis, Google Cloud APIs

Languages: Persian (native), English (fluent)
